

Provenance

/'prov.ən.əns/
the place of origin of something

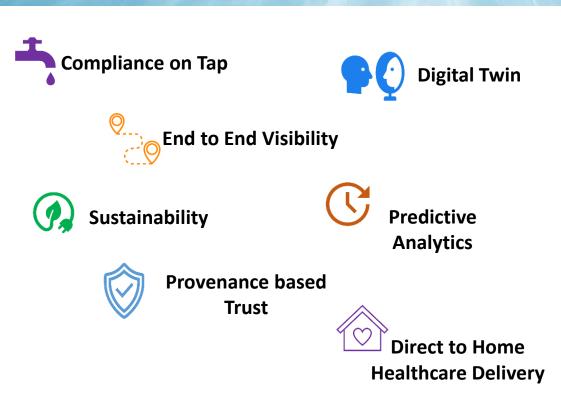

Regulatory Compliance

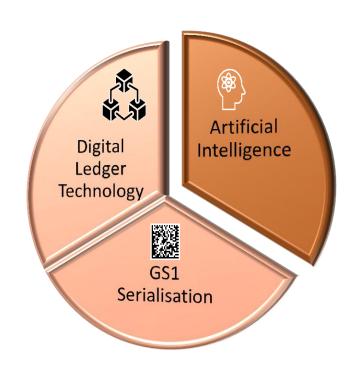

Some passports get an instant visa-free entry while others queue up at border controls

- ★ US FDA More stringent requirements for track and trace of pharmaceuticals
- ★ EU General Food Law Regulation Additional traceability requirements on Food and Feed products
- ★ UK Food Standards Agency New provenance requirements for ingredients used in food products

Emerging trends in Pharmaceutical Supply Chain

- Serialised Data = **Mobile Data**
- **Secure by Design**
- **Expanding Compliance** Requirements
- New countries, new requirements

DLT and Pharma Supply Chain

DLT is a distributed, decentralised database managed by multiple participants across multiple nodes.

Blockchain is a form of DLT.

Permanent

Next Generation Pharma

Features	Requirements
Secure by Design	Immutable 'Digital Twin '
	Embedded compliance
Just in Time	Accurate demand forecast
	End to end visibility
Sustainable	Recyclable
	Reduced Wastage
	Fewer product journeys
Consumer/ Patient Focused	Trust through Provenance Tracking
	Direct to Home delivery

GS1 Serialisation

Digital Ledger Technology

Artificial Intelligence

EVIDNT by Tongadive

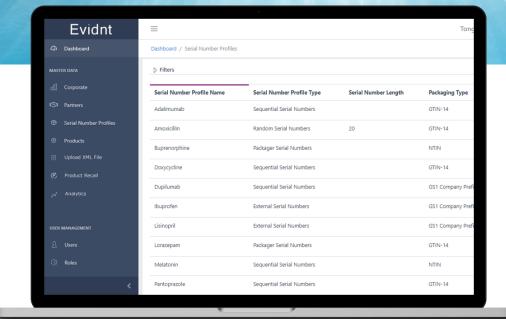

A lightweight, plug-and-play solution helping supply chain stakeholders <u>build secure</u>, <u>immutable</u>, <u>trustworthy and transparent digital footprint</u> of product journey from source to end consumer

Digital Ledger Technology

Machine Learning based AI

GS1 Serialisation

Track product's trustbased journey, conveniently and transparently!

Phase 1: DLT Blockchain enabled Compliance on Tap in Healthcare: Releasing December 2021

Phase 2: Smart Supply Chain with Predictive Analytics: Successful PoC with UK Government

Funding (Innovate UK)
